

AUTODOME Mounts and Accessories

AUTODOME 7000i/7100i cameras are available as fully-assembled pendant or in-ceiling units. These units are packaged without mounting hardware or accessories so that you can choose only the parts needed for your application and environment. Bosch offers a full complement of hardware and accessories (sold separately) for wall, corner, mast, roof, and pipe mount for indoor and outdoor environments, which allow the camera to be adapted easily to individual site requirements.

System overview

Power Supply Boxes

Bosch offers power supply boxes for all mounting options and power supply accessories to enhance the aesthetics of the boxes.

Bosch offers a variety of stand-alone power supply boxes that are available without a transformer (for 24 VAC power input) and with either a 120 VAC or a 230 VAC transformer. Each power supply box offers 100 W output and the power supply box enclosures are NEMA-rated.

Also available is a replacement power supply box cover.

Fiber Optic Kits

The Ethernet to SFP interface kit (VG4-SFPCKT) is a media converter module for use with AUTODOME 7000i cameras. This media converter is designed to accept a variety of 10/100 Mbps Small Form-factor Pluggable (SFP) modules for use with Multimode or Singlemode optical fiber with LC or SC connectors. The media converter module, along with the SFP module, is user-installed directly into the AUTODOME power supply box to provide an integrated fiber optic solution. The interface kit and the SFP module are a fiber optic kit that extends the range that the camera can receive commands and transmit video and data.

Pendant Mounts

The AUTODOME indoor/outdoor pendant housings can be connected to an arm, a roof, or to a pipe mount. Pendant arm mounts are available with a connected power supply box or as a separate arm with connected wiring. All pendant arm mounts can be connected to a corner or mast (pole) adapter, extending the installation options.

In addition to the arm mounts, Bosch offers a pipe mount and a roof parapet mount. The pipe mount allows an AUTODOME pendant housing to be attached to a 1-1/2 inch (NPS) pipe (user-supplied). The roof parapet mount is an aluminum pole that secures an AUTODOME pendant to a roof surface. In addition, accessories are available to secure the parapet mount to a flat roof surface.

Pendant housings must be mounted to an arm or to a pipe using one of the options below. Various mounting accessories are also available to extend these mounting options to a host of applications.

VGA-PEND-ARM	Arm mount with wiring, no power supply box
VG4-A-9543	Pipe mount for a 1-1/2 inch (NPS) pipe
VGA-ROOF-MOUNT	Roof mount with parapet only (requires additional purchase of VG4-A-9543)

In-ceiling Support Kits

AUTODOME in-ceiling housings do not require optional accessories when mounting to drywall ceilings, but support kits are available for specific installation needs.

For suspended or drop ceilings, Bosch offers a kit that provides the necessary support to secure the in-ceiling housing to a ceiling tile.

Bosch also offers a kit for AUTODOME 7000i in-ceiling cameras that is IP54-compliant with no additional purchases necessary.

In-ceiling housings can be mounted to a drywall ceiling out of the box, but Bosch offers various kits to attach an in-ceiling housing to a suspended or to a drop ceiling. Kits are also available to add IP54 environmental protection to these housings.

Support Kit	Description	For Use With
VGA-IC-SP	Bracket for suspended or drop ceilings	AUTODOME 7000 Series in-ceiling models

Bubbles

Bosch offers a range of bubbles for in-ceiling and pendant housings.

Acrylic bubbles offer enhanced image clarity for high-resolution images but are low-impact. The IK10-rated, nylon bubble provides both impact resistance and HD quality image resolution.

Clear bubbles offer maximum sensitivity by allowing as much light through as possible. Tinted bubbles offer coyness by making it difficult to see from the outside the direction the camera is facing.
